Course information

Course Website: my.nes.ru

Instructor's Office Hours: by appointment

Class Time: Wednesday, 13.45-17.00

Room Number: TBA

TAs: Altana Davydova

Course description

The objective of this course: the course is designed to provide students with the ability to conduct an economic analysis of policy issues related to international trade.

The learning goal: at the end of the course the students will be able to analyze the economic implications of various instruments of trade policy, trace the origins of various processes of international (global or regional) economic integration, and to discuss their implications for the international patterns of product specialization.

Course methodology: the course begins with a discussion of the effects of various trade policy instruments and includes applications of several cases. It proceeds to a discussion of the arguments for and against protection and managed trade. Special attention is paid to issues of trade policy and political economy of trade protection. We analyze the rationale for a World Trade Organization, custom unions and actual experience, and whether preferential trade agreements undermine or promote the multilateral trading system. Trade policy related economic sanctions will be discussed as well.

The following methods and forms of study are used in the course

- lectures (2 lectures per week)
- seminars (1 per week)
- written home assignments (2-3 per course)
- presentation and discussion of a trade policy issue

Course requirements, grading, and attendance policies

Presentation on trade policy issue

Group of up to 2 students (tbc) prepares and argues their position on the pre-approved trade policy topic. The rest of class and the audience will challenge their arguments. Both the presentation and Q&A will be accounted for the grade.

The general topic for presentations this year is: Trade and conflicts

Important dates for presentation

- 4th week of the module – the topic of the presentation should be approved
- Last week of the module – presentation

Students sit final exam. The final grade for the course consists of 20% of the grade for the home assignments, 20% for presentation and discussion (conditional on the presence during presentation seminar) and of 60% of the grade for the end-of-term exams.

Final exam format: closed book+ A4; 2 hours; exit – no; questions – yes.

Sample tasks for course evaluation

Sample topics of presentations

Small country in PTA

Turkey and EU

WTO & Environment

Liberalization and employment

Boeing vs. Airbus

Ireland vs. EU

Trade wars and conflicts

Sample: Final exam, 2018-2019

You have 2 hours. please, keep your answers brief and clear.

Necessary conditions for a satisfactory grade are positive points for three questions :

Good luck!

Problem 1. (10 points)

B is a small country that is considering the introduction of a tariff or an equivalent quota on computers. The Education Minister argues that the government should choose a tariff rather than a quota because the education rates are rising and the demand for computers is expected to grow in future years. Evaluate the Minister's argument in the context of the welfare impact of these two trade instruments.

Problem 2. (15 points)

Mexican producers use imported computer chips worth of \$ 700 and imported matrix displays worth of \$ 900 for the production of laptops, the world price of which is \$ 2,200.

- a) What will be the effective level of protection in laptop producing industry if Mexico introduces an ad valorem tariff of 30% on the import of laptops?
- b) What will be the effective level of protection in laptop producing industry, if in addition to the ad valorem tariff of 30% on import of laptops import tariffs of 10% on computer chips and 25% on matrix displays are set?

Problem 3. (40 points)

Ararat is a small country. Its meat products are supplied by competitive firms that are organized in the Meat Producers Association (MPA, for short). The association seeks to maximize aggregate profits Π (p) of its members, where p is the domestic price of meat.

The government of Ararat imposes quotas on the imports of meat. The quotas are owned by a large group of individuals who are not organized.

A) What is the domestic price of meat when the MPA lobbies for quotas?

After many efforts, the quota owners banded together and formed the Meat Importers Association (MIA, for short). The aim of the association is to lobby for quotas so as to maximize quota rents.

B) How will meat imports change as a result of the MIA's lobbying efforts? What will happen to the domestic price of meat?

Problem 4. (35 points)

A) Why might countries engage in preferential trade agreements?

B) Consider Eurasian economic union (EAEU) and specify which arguments are relevant to each member country.

C) Discuss positive and negative effects of EAEU on member countries.

D) What other potential options for trade integration were available for member countries of EAEU?

E) What are the main problems the EAEU faces today?

Course materials

Required textbooks and materials

There is no formal textbook for the course, I will refer in some cases to the following monographs and papers:
