

Fixed Income Instruments

module 5, academic year 2022-2023

Lecturer: Nikita Ermakov
nermakov@nes.ru

TA: Kirill Dortsev
kdortsev@nes.ru

Course description

The course is designed to provide a framework for the practical analysis of fixed income instruments. The primary focus is to gain skill and knowledge on calculating bond prices and swap prices, understanding interest curves, general hedging practices, and some general principles of the credit analysis.

Course requirements, grading, and attendance policies

Attendance. No formal attendance policy is applied to the course, however, the attendance of each class is expected.

Prerequisites. Familiarity with basic financial products and derivatives is desired, but not required.

Grading. The course grade is determined by results of home assignments and final exam:

- (40%) Home assignments. Total 4 (four) home assignments are required to be completed throughout the course.
- (60%) Final exam. The exam covers all topics of the course. The minimum passing threshold of the exam is 40% out of 100%.

The total weighted and adjusted **passing score is 55% out of 100%**.
