Course description

This course provides students with an understanding of the broad accounting principles, concepts, and the role of financial information in decision-making process. The learning is useful only if knowledge can be applied to the real economic issues. In class we discuss financial statements of the famous companies, and the articles on the related topics. Upon successful completion of this course, students should be able to prepare financial statements, analyze accounting information, and draw conclusions for effective business decisions.

Course requirements, grading, and attendance policies

The course grade is based on final exam, group projects, quizzes and class participation. The maximum amount of points available for each component is as follows:

Group Projects, Homework, Quizzes and In-Class Participation	35	pts
Final Group Project (report and presentation)	15	pts
<u>Closed-Book Final Exam</u>	<u>50</u>	<u>pts</u>
Total	100	pts

To pass the course students have to receive at least 53 points total out of possible 100, at least 18 points out of 50 at the final written examination, and perform all group projects. For group projects, all students are to be divided into groups up to four people. Submission deadlines are to be specified in the instructions to the group projects.
