

Financial Analysis and Accounting II

Module 2, 2022-2023

Elena Senatorova

PhD, Associate Professor
esenatorova@nes.ru

TA: Alyona Shigoreva, ashigoreva@nes.ru

Course description

The purpose of this course is to understand the theory, concepts and methods of financial accounting information particularly in the areas of financial statements, current and long-term assets and liabilities. The procedures and practices under International Financial Reporting Standards (IFRS) and Russian Accounting Standards (RAS) will be applied to the various topics in corporate financial accounting and reporting.

Course requirements, grading, and attendance policies

The course grade is based on final exam, group projects, quizzes and class participation. The maximum amount of points available for each component is as follows:

Group Projects, Cases, Homework, and In-Class Participation	38	pts
Midterm	12	pts
<u>Closed-Book Final Exam</u>	<u>50</u>	<u>pts</u>
Total	100	pts

To pass the course students have to receive at least 20 points out 50 at the final written examination, and perform all group projects. For group projects, all students are to be divided into groups up to five people. Submission deadlines are to be specified in the instructions to the group projects.
