Course description

This course provides broad view of corporate finance from the practical view and valuation of companies in different industries. It delivers comprehensive theoretical knowledge and understanding of how to use valuation techniques in practice.

The course consists of studying numerous real cases, which will also contribute to better understanding of main approaches, methods and concepts connected primarily with equity valuation. During the course students will familiarize with practices of company's valuation, learn to work on equity research tasks, write equity coverage reports and acquire relevant computation skills.

Course requirements, grading, and attendance policies

Note that no formal attendance policy is applied to the course, however, the attendance of each class is expected.

Prerequisites. Pre-requirements are core courses in accounting and corporate finance.

Grading. The grade for the course will be based on 3 assignments (2 individual home assignments, 1 group home assignment; 30% total) and in-class final exam (70%). In-class participation is welcomed, but not mandatory.

The total weighted and adjusted **passing score is 55% out of 100%.**
